Application/Control Number: 10/011,655

Art Unit: 1774

1. The election of species is hereby withdrawn.

2. Claims 1-20 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 of copending Application No. 10/011,681. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims are directed to the method of using the ink jet recording element of the other application and recite every limitation of the recording element therein.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented. It is noted that while this is a provisional rejection the copending application has been allowed.

- 3. JP 2000203154 is representative of the state of the art. It discloses an ink jet recording element comprising porous cross-linked polymeric particles and a binder in an ink jet recording layer. The document does not teach or suggest inclusion of both an anionic or cationic dispersant as well as an oppositely charged surfactant in the ink jet recording layer of the medium within the ratio of surfactant to dispersant of 0.04 parts to about 0.03 parts by weight.
- 4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Pamela R. Schwartz whose telephone number is 703-308-2424. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cynthia Kelly, can be reached on (703) 308-0449. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9310.

Application/Control Number: 10/011,655

Art Unit: 1774

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0661.
